

GTL3 LAMP

Ungapped E core: 0P41808EC  
 Bobbin: PC-B1808-B1  
 Wire gauge is 26awg for all windings.

Note:  
 the bobbin is polarized. Two pins are spaced slightly closer. I have highlighted in the data sheet in Documents folder.

P3 is a "cross over" jumper. If the circuit does not oscillate, connect 2-3 and 4-1 instead of 1-2 and 3-4.
